

Zone Defense® Mini Forward Dash Camera

CAM.313MS.NML

The Zone Defense Mini Forward camera was designed specifically with a small footprint for flexible mounting options. In addition, the camera is available with or without infra-red. The version without infra-red gives drivers the ability to see through the windshield without image quality being affected by the cab's ambient light. The result is clear, crisp video capture for your recording device. This camera is generally purchased by individuals that have a MDVR system installed and wish to add more cameras for recording.

Easily integrate dash camera with mobile digital video recorder

Eliminate poor video quality caused by in-cab lighting

Small camera supports flexible mounting options

Key Features:

120° viewing angle meets FMVSS 111 field of view requirements

Small footprint camera eliminates cab clutter

Video and images are not affected by in-cab ambient lighting

Operates on 12v DC up to 24v DC

IP69K rating and 7G rating to withstand power washing and harsh vibration

Available options:

With infra-red for night vision (CAM.313.MS.NML)

Without infra-red to eliminate in-cab ambient lighting affects (CAM.313.MS.NML.NO.IR)

Integrates with Zone Defense and other 3rd Party Monitors and Recording devices (with OEM adapter cable sold separately)

Standard 1 year warranty (5 year available)

Safety is an investment and you need a system that is flexible enough to meet your needs and budget today, while easily growing into the future as your needs and resources change. That is why Zone Defense manufactures our cabled solutions using a modular approach so you can easily add on to your safety system as your program expands.
