

Zone Defense® Mini Dome Camera

CAM.313DM

The Zone Defense Mini Dome camera is a smaller version of the Zone Defense Dome camera, best used when you have limited space for mounting and do not need to hear what is happening in the area being monitored. It was designed to mount on the dome of a vehicle, bus, armored truck, prison transport truck or any vehicle with a cargo area that needs to be monitored. The small camera provides flexible mounting options, is mounted inside the cargo hold, and feeds to a monitor and/or an MDVR system that allows you to monitor and capture the activity happening behind the driver.

Monitor passenger
activity or cargo
hold areas

Mini-camera for
flexible mounting

Easily integrate
with existing
monitors

Key Features:

120° viewing angle provides crisp, clear picture of inside activities

Small footprint for flexible mounting options in multiple vehicle types

Operates on 12v DC up to 24v DC

IP69K rating and 7G rating to withstand power washing and harsh vibration

Integrates with Zone Defense and other 3rd Party Monitors and Recording devices (with OEM adapter cable sold separately)

Standard 1 year warranty (5 year available)

Safety is an investment and you need a system that is flexible enough to meet your needs and budget today, while easily growing into the future as your needs and resources change. That is why Zone Defense manufactures our cabled solutions using a modular approach so you can easily add on to your safety system as your program expands.
